Attention Non-Profit Organizations:

In the spring of 2018, The Friends of Reading Hospital implemented a program where they will share the cost of the AED with non-profit organizations. Regularly priced at \$2,809, The Friends are able to obtain the AEDs at a discounted rate of \$1,694.60. Split in half it is a cost of \$847.30 for approved non-profits. The Friends are willing to spend up to \$5,000 per year on this program.

Included in this cost are the AED, a wall-mounted case, ambu-kit, spare pads and signage for AEDs placed in buildings.

The non-profit is responsible for maintaining the AED, checking the battery monthly, and changing the battery as needed. The Friends share their discount on batteries.

NOTE: In the event that the AED is used in a cardiac emergency, The Friends will replace the battery and pads at no cost to the owner.

The Friends of Reading Hospital have given over \$1.3 million in AED donations throughout Berks County since its inception in 2010. They have put them in schools, first responder vehicles and other locations where large crowds gather, such as the arena and stadium.

Make checks payable to **The Friends of Reading Hospital.**
